SPONSORSHIPS 2023

WHAT IS A MAKERSPACE?

Makerspaces are essentially community centers with a variety of tools and work areas where a member pays a fixed rate to gain access to those spaces, similar to a gym membership. Manufacturing equipment, work space and educational opportunities combine to enable community members to design, prototype and produce goods and art that wouldn't be feasible had they been working alone. Each makerspace is unique in how they are arranged in order to best fit the purposes of the community they serve. The Concord Makerspace has an emphasis on woodshop and prototyping equipment, and works to make these assets available to emerging businesses and hobbyists alike. Several pieces of equipment that are debuting in 2023 cannot currently be found in any other New Hampshire public makerspace.

Since opening its doors in 2020, the Concord Makerspace has upgraded its building to a more industrious location, one with increased convenience to major highways. We are growing steadily in both the tool assets and educational opportunities offered. Members often teach classes within their specialty to other members. Previously run classes have been on diverse subjects including polymer clay jewelry, introduction to 3d printing, Fusion 360 for beginners, mastering the table saw dado cut, machine and hand embroidery, leveraging social media for business results, and many more. We've run the 1 Million Cups seminars as part of our early business incubation and acceleration pre-Covid.

Concord Makerspace is a 501(c)(3) non profit organization* in good standing with a diverse, 8 member Board of Directors and has operated for over 4 years as an all-volunteer organization.

OUR CORE MISSION:

To develop a safe, fun, and collaborative environment that supports makers of all ages and skill sets joining to teach, learn, create, explore and prosper together. We are creating a strong and sustainable organization that contributes to Concord's regional economy and builds a more vibrant community.

SPONSORSHIPS IN 2023:

We are currently fundraising to build an upgraded production center in the heart of our woodshop, and erect signage at our new location. We are additionally seeking sponsorships to help make these dreams possible. If you're interested in sponsorship, please email us with the information provided below to:
